ATI Companies Open a New Office Location in New Orleans at:

1539 MacArthur Avenue
Harvey, LA 70058
866-DRILLER (866-375-5537)

SB Drilling, Inc., the geotechnical drilling services subsidiary of ATI Companies (ATI), has opened an office in Louisiana as a center of operations for the engineering support services we are providing for both the Hurricane Protection Project and the New Orleans levees repair project. ATI currently has four drill rigs working on these.

ATI an Exhibitor at Annual AEG Meeting in New Orleans

To emphasize our presence in the New Orleans area, ATI will be an Exhibitor in the 51st Annual Meeting of the Association of Engineering Geologists, September 15 – 20. For a FREE Exhibit Hall visitor's pass, call us at 727-328-0268 or contact us at info@ambienttech.com.

ATI and MOS Grondwatertechniek Forge a Strategic Alliance to Tackle Groundwater Dewatering Projects

ATI (Florida, USA), its affiliate ATI Panamericana, S.A. (Panama), and MOS Grondwatertechniek International (MOS; Netherlands) have forged an alliance to provide groundwater dewatering technologies and control systems for major civil engineering projects throughout the USA and at the international level. This alliance has a combined 100 years of dewatering experience and expertise.

While MOS will provide management of and equipment for projects in Europe and abroad, ATI will provide management of and equipment for projects in the USA. MOS has vast expertise in dewatering systems in the Netherlands and has developed the ExactFlow method for controlling, monitoring, and fine-tuning dewatering systems via a remote (i.e., wireless) GSM-connection. ATI has over 15 years of drilling and dewatering experience in Florida, Alabama, and Louisiana and ATI Panamericana, S.A., is rapidly developing similar experience in Central America.

This combined expertise in dewatering and drilling may be useful to your projects. Contact us at 727-328-0268 or at info@ambienttech.com to see how we can help you.
